Education

- **Ph.D.'s degree** in Applied mathematics
- **Master's degree** in Applied mathematics

License's degree in Bachelor of Education

Functions and Affiliations

Functions: - Secondary education teacher (1993-2010).
- Research professor (2011 - 2023).

Teaching modules

International publications

Teaching modules: Mathematics 1+ Mathematics 2+Analyse

1+Analyse 2.

International publications: A. Necib, and A. Merad, Laplace transform and Homotopy perturbation methods for solving the pseudo-hyperbolic integro-differential problems with purely integral conditions, Kragujevac Journal of Mathematics, Volume 44(2) (2020), Pages 251-272.

Interests and Qualifications

Research field: 1) Partial differential equations with non-local boundary conditions.

2) Finding approximate solutions to the differential equations using the homotopy perturbation method.
