

English exam correction for 1st year math/computer science students

Exercise 1: State whether the following statements are true or false (10p)

1. Integrating listening and writing is considered relatively easy.

True 1pts

2. Substitution in speaking involves repeating without making any changes.

False 1pts

3. Decoding in reading is the ability to predict what comes next in a text.

False 1pts

4. The sixth step in writing is free writing, where you use your own words and structure.

True 1pts

5. Input in language learning refers to speaking and writing.

False 1pts

6. Language and culture should be separated in language learning for better focus.

False 1pts

7. The third step in retention during listening involves long-term retention of information.

True 1pts

8. The correct order for language skill learning is listening, followed by speaking, then reading, and finally writing.

False 1pts

9. A restaurant menu written by a Japanese restaurant owner is considered an authentic material for learning English.

False 1pts

10. Integrating three language skills together in one exercise is possible.

True 1pts

Exercise 2: Choose two of the four skills and write a paragraph on how to learn them together. (10p)

Students are expected to:

- Choose two of the four skills (Listening, Speaking, Reading, Writing).
- Write a paragraph.

The paragraph should include:

- How to learn the two skills separately
- How to integrate the two skills together
- The mention of Authentic materials
- Emphasis on not separating language from culture

Mark breakdown:

- Writing anything at all grants you **2pts**
- Writing a full paragraph grants you **5 pts**
- Writing a paragraph on the topic grants you **6 pts**
- The rest of the points will depend on whether the information is correct or not, up to **10 pts**

P.S. Nuance lies in the content
