

University of Oum El Bouaghi

Master's degree in Law

Program Description:

A/ Conditions for joining the program:

In order to join the master's degree in of Advanced Public law , the student must have a bachelor's degree in accordance with the system of the LMD specialization in public law, in addition to other criteria, mainly that the candidate does not have a pedagogical delay from the date of obtaining the baccalaureate certificate, except in legally justified cases, in addition to the student not being subjected to disciplinary punishment during his academic path, with the need for scientific conditions related mainly to the rate of ranking and the number of available pedagogical seats.

B/ Program Objectives:

The Master's program Advanced Public law in aims to prepare students intellectually to pursue a PhD in Public law, which ends by teaching at the college as a research professor in the legal field or working in many different fields such as the judiciary, law, documentation, judicial bailiffs, joining the security corps, the national gendarmerie and customs after success in the competition held at the national level.

This program also allows for positions in the central or local administration in Algeria, and provides the necessary tools to continue their education or excel in communication in the workplace, thus working on the development of the sector in which they work, which benefits the status of the Algerian state.

C- Targeted Qualifications and Capabilities:

This program enables:

- Develop his ability to deal with legal texts by analysis and commentary
- Dealing with public institutions of an administrative as well as economic nature and judicial bodies.
- Control scientific research tools and techniques and identify sources of information.
- Enable students to train in the English language within the framework of specialization.

D. Training follow-up indicators:

– The indicators of the follow-up of the project depend mainly on the good training in the four semesters, and there is no doubt that the accurate training that will recruit the best and most efficient professors will provide the student with the most important knowledge, and make his basic training allow him to definitely move to the doctoral stage in the midst of the same specialization, in more accurate and focused subjects in line with the legal, social and economic reality of living.

– In this context, the project is followed up through:

– Scientific forums organized for the benefit of students of specialization by researchers specialized in Public law.

– Research presented by students in directed work.

– Field internships to be programmed later in judicial bodies.
