### ***First year English exam ( section one and two ) :***

#### **Read the paragraph and answer the questions**

In informatics, data management is a key component of modern computing systems. Computers store, process, and analyze large amounts of data to support decision-making. In the past, data was stored in simple files, but today databases and cloud technologies are widely used. In the future, data security and privacy will become even more important as information continues to grow. For this reason, studying data management is essential for informatics students.

#### **Questions :**

#### **I. Paragraph Structure (6 points)**

The **topic sentence** of the paragraph is: **2 POINTS**

- a) Computers store, process, and analyze large amounts of data.
- b) In the past, data was stored in simple files.
- c) **In informatics, data management is a key component of modern computing systems.**
- d) For this reason, studying data management is essential for informatics students.

The **supporting sentences** mainly: **2 POINTS**

- a) Introduce a new topic
- b) **Explain and develop the main idea**
- c) Summarize the paragraph
