[illegible]

## Model Answer: Second English Exam

**Exercise 01:** Categorize the following terms under the correct heading according to their meaning:

**(06 pts)**

- multiply - increase - drop - reached a peak - levelled off - bottomed out - fall - decrease  
- stable - consistent - rise - the lowest level.

**0.5 pt  
for each**

| up        | down      | same          | top             | bottom            |
|-----------|-----------|---------------|-----------------|-------------------|
| -multiply | -drop     | -levelled off | -reached a peak | -bottomed out     |
| -increase | -fall     | -stable       |                 | -the lowest level |
| -rise     | -decrease | -consistent   |                 |                   |

**Exercise 02:** Read the statements carefully and decide if they are True (T) or False (F).  
Correct the wrong ones.

**(04 pts)**

1. Speaking is only about accuracy **(False)**

**0.5 pt**

➤ Speaking is not only about accuracy; it is also about fluency, pronunciation, vocabulary, and interaction.

**0.5 pt**

2. Skimming and scanning are mainly post-reading strategies used to check comprehension after detailed reading. **(False)**

**0.5 pt**

➤ Skimming and scanning are mainly while-reading or pre-reading strategies used to get the general idea or find specific information quickly.

**0.5 pt**

3. Poor organization of ideas is one of difficulties of writing **(True)**

**01 pt**

4. Unfamiliar accents may disrupt phonological decoding and delay understanding **(True)**

**01 pt**

**Exercise 03:** Read the following definitions and provide the corresponding term for each one:

**(06 pts)**

**a) Heat:** is the energy transferred between two objects at different temperatures.

**01 pt**

**b) Temperature:** is a measure of average kinetic energy per molecule in a substance. It is different from heat, although the two quantities are intimately related.

**01 pt**

**c) Velocity:** is the rate of change of position with respect to time.

**01 pt**

**d) Acceleration:** is the rate of change of velocity with time.

**01 pt**

**e) Mass:** refers to the amount of matter that an object -- whether liquid, gas or solid -- contains. It's generally measured in kilograms and grams, and it's a constant quantity that doesn't change, regardless of where an object resides.

**01 pt**

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                    |
