The third axis: Feminist content on the Instagram platform in Algeria

The fourth axis: Algerian women's trends and uses of feminist content via Instagram

Foreword:

Today, the world knows an increase in the number of users of various social media platforms which in turn were able because of their characteristics and advantages to become a virtual space where their users find complete freedom to express their opinions, present their ideas and discuss them with others. Among these platforms, we find the Instagram platform which is one of the communicative platforms that knows fast grown since its appearance on the virtual scene, as its users number in millions and their content is distributed in various fields which makes Instagram today becomes a source for exchanging knowledge and experiences among its users.

This development and spread of Instagram has also been observed in Algeria, especially with regard to the presence of women through it where Algerian women have created a special place for them through this platform and through the activities of this study day we seek to learn about the various aspects and roles that they adopt through Instagram, sometimes as a content maker and other times as a recipient of this content, we will also try to monitor the nature of the feminist content spread on this platform in Algeria.
