### 06.Important dates:

Last date for submitting abstracts: 15 /09/2021

Last date for sending entries: 10/20/2021

Reply by accepting the inputs: 10/30/2021

Date of the event: 03/11/2021

contact: [arabe.nat.2021@univ-oeb.dz](mailto:arabe.nat.2021@univ-oeb.dz).

### .07Participation Terms and Mechanisms:

The researcher must adhere to the sober scientific method, and serious research based on criticism and analysis.

To be disciplined with the content and themes of the forum, with the need to focus on applied field studies.

The research should be written in Arabic.

The research has not been published, reproduced, or participated in a previous event.

The size of the search should not exceed 15 pages and not be less than 10 pages (16 lines) simplified Arabic...

Bilateral entries are acceptable.

The interventions are subject to scientific arbitration by a specialized scientific committee.

Margins are automatically placed at the end of the entry, followed by a list of sources and references.

**Note:** Good works are selected for publication in detective magazine

Forum Chair: Dr. Hamid Kbaili

In cooperation with PhD students, batch 2019/2020

## 01. Preamble

Recent years have witnessed a wide tendency to invest in education and communication technology in its broad sense in teaching the Arabic language, and considering language as a means of communication, and an important element, whether in terms of learning it in itself, or in terms of the role of mastering and understanding it as a subject in mastering other educational materials, In line with the forward-looking vision of the Ministry of Higher Education and Scientific Research and the University of Larbi Ben M'hidi in Oum El Bouaghi, which calls for the development of the Arabic language distance education system and the introduction and activation of technological means in scientific research in general.

This forum, proposed by Dr. Hamid Kebaili, in cooperation with the doctoral students of the class of 2019/2020, comes to address the most important problems and prospects desired in this subject, opening the door to discussions and suggestions that hopefully will reveal areas of difficulties, and elicit mechanisms that can increase the relationship between the two parties to the process. The educational strength is robust, especially as we know the lexical, morphological and syntactic peculiarities of this language that enable it to withstand the continuous technological lessons, which will inevitably enable us to invest this virtual space effectively, and enable the student to receive the various sections of the Arabic language and its aesthetics with ease. While ensuring that the process of understanding and understanding is achieved, there is no doubt that this can only be achieved by investing intertwined elements, mainly images, audio, video... and the various programs and technologies provided by artificial intelligence systems.

## 02. Forum problem

Based on the previous approaches, we present this forum and seek to answer several problems, most notably

What is the current issue of distance education in teaching Arabic, and what are the prospects for its development in Algeria ?

What are the most important problems facing the teaching of Arabic language activities (rhetoric, morphology, grammar..(in the various educational stages. ?

What are the dimensions of this technical transformation in Arabic education. ?

What are the reality and prospects for teaching and analyzing literary texts through the distance education system?

### 03. Forum topics:

The first axis : the emergence of distance education.

The second axis : the challenges of distance education in Algeria.

The third axis : The role of electronic texts in teaching Arabic (electronic story, tapes...).

The fourth axis : Teaching Arabic language activities (rhetoric, morphology, grammar, text analysis...) from a distance.

Fifth Axis: Programs available in the distance learning of the Arabic language for native and non-native speaker.

Theme Six: Contemporary electronic media and its role in learning and teaching the Arabic language.

The seventh axis : Teaching Arabic and linguistic immersion.

### 04. Forum objectives:

- 1-Evaluation of the current distance education through the experience that the Algerian University has undergone due to the global epidemiological situation, and also seeks to look to the future prospects for teaching Arabic.
- 2-Deepening research in the field of systems and programs available in distance education of the Arabic language.

3-Bringing researchers and learners closer to how modern means can be used in teaching Arabic language activities.

4- Enabling researchers, especially doctoral students, to interact with researchers from different universities in the country, in order to exchange experiences and knowledge in this field.
