Organizes the
International Conference on Mechanical Sciences

CISM'21

The objective of the International Conference on Mechanical Sciences (CISM) is to promote scientific exchanges and cooperation between researchers and Ph.D. students. It creates a scientific research environment and allows meeting, presentation of the current research work, sharing of experience and discussion of ideas. In addition, four plenary conferences will also be scheduled in which high-level research results will be presented.

CISM'21 themes:

- 1) Energy: Fluid flows, heat and mass transfers, combustion, internal combustion engines, gas turbines, steam turbines, ...
- 2) Renewable energy: Solar energy, wind power, biomass, etc.
- 3) Mechanics: Mechanical construction and manufacture, composite materials, Structural dynamics, ...
- 4) Robotics: Parallel robots, hyper-redundant robots, cooperative robots, ...
