Problematic:

What society is witnessing with all its institutions, of deviation from norms, retreat of customs, transformation of faith and disregard of law and globalization of thought towards a wave of moral decay and social deviation of various kinds and forms, has resulted in several strange and alien phenomena in the fabric of conservative society such as Algerian society, and from Among these phenomena is the phenomenon of single mothers that has spread in recent years, in a striking way, making it a sociological reality that imposes its existence and takes a dangerous and disturbing dimension, as it contradicts and contradicts the ladder of social values and standards on the one hand, and the provisions of the Islamic religion on the other hand.

This phenomenon is due to many causes, and it results in many disturbances at the level of psychological compatibility and social adjustment, in addition to in some cases murder under the pretext of honor killing, against a mental background that believes in the inferiority of women, and is based on symbolic violence and male dominance that is still it imposes its influence on society, and exposes the single mother, and not her partner, to all kinds of marginalization, persecution and social punishment.

Objectives of the National Forum:

- Revealing what we do not know about the issue of single mothers, as a qualitative scientific attempt in the field of research and social psychological studies.
