3. The number of search pages should not exceed 20 pages (A4), including supplements and references.
- 4- The Arabicsimplified font type must be on a scale (14) for the search meter, and the margins shall be on a scale (12) and page boundaries (2 cm) on each side.
- 5- Systematic work is in accordance with the APA system
- 6- The research should include a summary in Arabic and another in English.

problematic

The family is one of the social educational institutions in society that contributes to transforming the child from a biological being into a social being based on providing a family atmosphere with good social relationships, in addition to the emotional security it provides to ensure good psychological development and form a personality together free of mental illness. The family through its full care of the child and the provision of all its material supplies of food, clothing and treatment... All these circumstances indicate the quality of family life that exists to satisfy the needs of the child within the family and make him feel satisfied while living in it, which makes him characterized by a high sense of activity, excellence and creativity at various levels of study, including the university level. A university student who lives in a family with a good and appropriate climate pushes him to achieve his ambitions assumes that this family climate will help him develop and raise his creative thinking and reflect on his performance and academic achievement.

Objectives of the National Forum:

- Identify indicators of the quality of family life in the community.
- To know the extent to which the quality of family life is linked to the skills of creativity of the university student.
- Bringing the topic up for discussion and discussing ideas between different professors and researchers in this field.
