**Topic :**

Radio has been and continues to provide a distinguished service to its audience, particularly with regard to awareness and awareness content and guidance in various areas of daily life.

The success of radio media is due to its commitment to professional standards such as accurate reporting information and countering rumors spreading through social media, thereby enhancing citizen confidence.

Radio has a prominent role to play in communicating people's voices and issues, and their role is all the more important during the spread of epidemics, where they carry out awareness and awareness of the importance of health prevention and awareness among people.

Algerian radio, like other media organizations, dealt with the Corona crisis by strengthening its programs and efforts in coordination with various health agencies, as an intermediary for the transmission of information, a discussion platform and a space for awareness and awareness.

Algerian radio, with its various channels, was also a tool to respond to the rumors that spread during this epidemic crisis, and worked to educate the public and stimulate solidarity and solidarity, so we are looking through this seminar on the strategy and efforts of Algerian radio in the face of the Corona epidemic crisis.
