

Preamble

The entrepreneur is the revolutionary of the economy, Joseph Alois Schumpeter recalls that the entrepreneur is the first agent of economic development, this has been constantly confirmed with the development of various economic theories, in particular the theory of economic development. Achieving economic equilibrium depends on the existence of the entrepreneurial ecosystem that offers entrepreneurs and their startups significant opportunities for success, and develops the business environment and makes it a constant need for innovative projects and new.

This orientation has enabled researchers, academics, professionals and decision-makers to become aware of the importance of entrepreneurship in the achievement of sustainable development and to bet on it as a means of development in various economic, social, environmental and scientific fields... etc. For developed and developing countries, innovative and entrepreneurial projects and startups are seen as a means of economic diversification, an important source of income and wealth, and an essential pillar to support economic development, including large institutions, financial institutions or banks. It is also considered to be the basic nucleus for absorbing social problems, especially labor recruitment and elimination of unemployment. From an environmental point of view, innovative and entrepreneurial projects, in particular recycling projects, have contributed to waste recycling and environmental safety. From a scientific point of view, entrepreneurship is a way for innovative researchers and students to implement their innovative ideas and projects.

Algeria, like other countries, has realized the importance of entrepreneurship and its place in economic diversification outside the hydrocarbon sector and the achievement of sustainable development in various fields. Higher authorities have begun to value and embody many mechanisms, policies and procedures that support entrepreneurship and startups, including: the establishment of a Ministry of Microenterprise, Startups and the Economy of knowledge, project support mechanisms (the National Agency for Youth Employment Support ANSEJ, the National Unemployment Insurance Fund CNAC, the National Agency for the Management of Micro-credits ANGEM), incubators and business accelerators, entrepreneurship houses at university level, etc. The question remains as to the effectiveness of these mechanisms and policies at the field level to form an integrated entrepreneurial ecosystem and achieve sustainable development in Algeria. Therefore, the problematic of the colloquium can be formulated as follows:

How effective are the mechanisms and policies of entrepreneurship in achieving sustainable development in Algeria? And what are the prospects for its development to reach the entrepreneurial ecosystem?

Entrepreneurship and sustainable development issues

Between opportunities and challenges

Colloquium Calendar

- limited Date of papers reception: May 12, 2022
- Date of response to accepted articles: May 26, 2022
- Colloquium date: June 12-13, 2022

Forum moderators

- Honorary president of the Colloquium: Prof. DIBI Zohir- Rector of the University
- General Supervisor of the conference: Prof. SERARMA abd El Ouahid- Dean of the faculty
- General coordinator of the conference: Prof. DJEBAR Bouketir- Director of COFIFAS Laboratory
- Conference president: Dr. CHERGUI Khalil - Member of the socio-economic project
- Vice-president: Dr. AICHOUC Riad - Socio-economic project president
- President of the Scientific Committee: Pr. HARKAT Saida - Member of the Socio-economic Project
- President of the Organizing Committee: Dr. LAMRAOUI Salim - Member of the socio-economic project

Participation form

- Last name and first name:
- Scientific grade :
- Job :
- Affiliation :
- Phone :
- E-mail :
- Axis of the participation :
- Article title :

- Seventh axis: obstacles and challenges of entrepreneurial work in Algeria;
- Eighth axis: International experiences in supporting entrepreneurial projects to achieve sustainable development.

Target groups for this Colloquium:

The Colloquium attracts several categories and sectors in the field of entrepreneurship:

- Academics and researchers interested in entrepreneurship research;
- Professionals from projects support institutions, business incubators and accelerators, and commercial and Islamic banks;
- Managers and decision-makers interested in entrepreneurship and start-ups.

Conditions for submitting scientific papers

Scientific papers submitted to participate must meet the following requirements:

- Scientific originality and seriousness, the submitted paper must not be presented at any other scientific event;
- Papers are accepted in all three languages (Arabic, English and French);
- The article is structured following the IMRAD format and APA citation style;
- Articles must be submitted in Word format; Where you write in Arabic, font size 13, Simplified Arabic style, and in a foreign language, font size 12, Times New Roman style; The margins are 2 cm for all sides, the document should not be less than 10 pages and not more than 20 pages;
- The maximum number of authors in joint articles is two;
- Participation fees: 2000 DZD.
- All accepted papers are published in the colloquium book.

The Objectives

- As part of the socio-economic research project, we aim by organizing this scientific event to achieve a number of objectives:
- Knowing the components of building an integrated entrepreneurial ecosystem;
- To know the importance of innovative and entrepreneurial projects and startups in the achievement of sustainable development;
- To know the effectiveness of the mechanisms, policies, procedures and legal frameworks adopted in Algeria to support entrepreneurial work in achieving sustainable development;
- To know the obstacles to entrepreneurial work in Algeria, from the idea to financing to construction;
- Connect academics and students interested in entrepreneurship with professionals (heads of project support institutions and bank directors) to explore the opportunities and obstacles creating startups in order to disseminate entrepreneurial thinking.

Axes :

- First axis: Entrepreneurship and entrepreneurial ecosystem;
- Second axis: the importance of entrepreneurship in achieving sustainable development in Algeria;
- Third axis: Entrepreneurship and innovative economy in Algeria;
- Fourth axis: the positioning of the university in supporting entrepreneurial work in Algeria;
- Fifth axis: the status of project support systems in support of entrepreneurial work;
- Sixth axis: the place of Islamic banks and finance in supporting entrepreneurial work;
