Organize the **1st National Conference on Nonlinear Differential Equations and their Applications.**

The event is going to happen in Faculty of Exact Sciences & Natural Sciences and Life.

The National Conference on Nonlinear Differential Equations and their Applications aims to discuss and highlight the latest ideas and research results in applied mathematics, especially the areas of mathematical modeling, nonlinear PDE's, nonlinear differential equations, numerical analysis and their applications.

The meeting will be an excellent opportunity for national exposure and interaction among scientists, also to transmit the experiences of mathematicians to Ph.D. students, as well as to promote contacts and collaborations between the participants, and contribute to creating new open problems in applied mathematics and getting answers for the youngest research problems.
