**The First National Seminar on Fixed Point theory and its applications**  
**April 10, 2025**

**Location :** Lecture Hall (Block I ), University of Oum El Bouaghi

**Problem Statement :** The study of fixed point theory has profound implications for both theoretical mathematics and practical applications. Understanding the existence and uniqueness of solutions through various fixed point theorems is crucial in modeling real-world phenomena. This seminar aims to explore advanced fixed point techniques across multiple disciplines

**Objectives :**

1. Explore the theoretical foundations in the domain.
2. Discuss recent advancements
3. Knowledge exchange between researchers
4. Present case studies and real-world applications

**Conference Themes**

1. Fixed points
2. Differential equations
3. Applied Mathematics
